

# Hire agile developers to create something together that your users will love

## WHY WORK WITH US

When you partner with Agile Software Workshop, you will work with the highest-quality development talent and project managers in the industry. With a unique focus on building strong, collaborative relationships with clients, we have created a solid reputation for exceeding our client expectations with quality work and fast delivery turnaround.

"...how impressed I am with the product and everyone who is/has been involved in its creation! I have played around with it this morning and find it mega cool - restaurants will love this! I'm really proud of being part of such a cool team with such a top dollar product."

-Christopher Persson, President, Livebookings

## WHAT WE DO

We've produced top quality applications with hundreds of clients for more than 12 years. From one person startups to Fortune 500 enterprises, and here's what we can do for you.

## Small agile teams, Big results.

You'll be working with a small, dedicated team built to fit the needs of your project. Each team works on one project at a time to stay focused. We use tools like Trello, Slack and GitHub to communicate frequently.

### HOW WE LIKE TO WORK:

- In small teams of two to four
- In weekly iterations of focused work
- At a sustainable pace
- With consistent communication
- Flexibly based on project needs

## Let's make something great together

We are focus on delivering working software over contract negotiation

## WHO WE ARE

At Agile Software Workshop, we provide innovative custom software development service to benefit our customers.

Need help in IT Outsourcing, Software development, Mobile App development? You've got the right place.

Agile software workshop is a branch of Shinetech Software. Founded in 2011, With extensive experience integrating in-house and global outsourced development teams, our team has led dramatic cost reductions and time savings for client companies everywhere.

Over the past years, Agile Software Workshop has successfully completed many software development projects which includes WEB, Mobile and Desktop applications.

Our team always aims to bring its clients high-quality software which are precisely adapted to their needs.

## CUSTOMERS

## CASE STUDIES

### Livebookings: Development of Europe's Largest Restaurant Booking System

Livebookings is a UK based online restaurant reservations and marketing company committed to helping restaurants to become more profitable. They have a team of 50 in house developers and outsource the non-core products offshore to reduce the development cost. Shinetech built an offshore development team to assist client in their product development. During our three year collaboration several SaaS products were completed and successfully launched to the markets.

## INSIGHTS OF OUR DEVELOPERS

### Something You Don't Know about ODC Service

By Deshui Wang on Mar 13th 2017

For our company, ODC accounts for a large proportion of our entire company's business, and most of the business that our branches perform is ODC as well. But do every one of us have a correct and proper understanding of ODC project? I do not think so, which is why I am writing this article and to share my understanding of ODC. In this article, our engineers can learn what ODC is; and on the other hand, our customers can also learn what the real ODC service is, its advantages and the potential consequences if not handled properly.

Some one-sided understanding of ODC

There are some explanations of ODC which can be heard inside the company, such as:

- ODC is Paid on a monthly basis

In my opinion, paid on a monthly basis is only a form of payment for ODC. It is not a service at all.

- ODC is Paid by time

This is also a one-sided understanding. One hour, one month or one year, they all are time. But if the service requires only a couple of days, could it be called ODC? I do not think so.

- ODC is Offshore Development Center

This explanation is too "shallow". Offshore development center, offshore research and development center, if we understand it this way, then ODC is merely an offshore office!
